**TRITON PCS LICENSE COMPANY L.L.C.
PHASE II E911 IMPLEMENTATION REPORT
August 2, 2004**

Triton PCS License Company L.L.C. ("Triton"), by its attorneys, hereby submits its eighth quarterly enhanced 911 ("E911") report to the Federal Communications Commission ("Commission") pursuant to the Commission's decision to afford Tier II carriers additional time to meet their Phase II E911 obligations.¹ In this report, as required by the *Order to Stay*, Triton updates the status of its E911 Phase I and Phase II deployment progress.²

I. STATUS OF PENDING E911 PHASE I AND PHASE II REQUESTS.

Triton operates a wireless network that covers approximately 13.6 million people in Virginia, North and South Carolina, northeastern Tennessee and northern Georgia. This service area covers six major trading areas ("MTAs") and thirty-six basic trading areas ("BTAs"), primarily in rural and secondary markets. The Triton network currently utilizes TDMA

¹ Revisions to the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadline for Non-Nationwide CMRS Carriers, Order to Stay, 17 FCC Rcd 14841 (2002) at ¶¶ 28-31 (hereinafter "Order to Stay"). Tier II carriers are defined as non-nationwide carriers that had over 500,000 subscribers as of year-end 2001.

technology. Triton is continuing with its plans to overlay GSM technology for the majority of its network and although it anticipates completing this overlay by the end of 2004, it expects to have only a limited number of GSM subscribers by year's end.

Triton continues to make significant progress in its efforts to deploy Phase I location capability services. To date, Triton has received 198 requests for Phase I service. Of those requests, 179 are in service and 19 are pending. For these 19 outstanding requests, the following summary outlines their status:

Current Status	Count
PSAP and Triton mutually agree that the PSAP is not ready for various reasons, including LEC, CPE, selective router and database issues or a PSAP is simply not ready to integrate at this time or PSAP has withdrawn its request.	7
Ready to deploy, mutually agreed- upon schedule in place	2
Less than six months old – in planning stages	10
Total	19

For specific details regarding outstanding requests, including details applicable to each request that has been pending for more than six months, please refer to the Appendix to this report.

Triton also is making significant progress towards fulfilling requests for Phase II service. To date, Triton has received 125 Phase II requests. For all of the requests that came due during the preceding quarter, either Phase II service has been deployed or a mutually agreed upon schedule for deployment has been arranged between Triton and the PSAP entity. Accordingly, Triton has met its deployment benchmark for the period preceding this Quarterly Report.³

² As required in the Order to Stay, Triton is providing this quarterly report to the Executive Directors of APCO, NENA and NASNA and their counsel.

³ See Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Petition of City of Richardson, Texas, Order on Reconsideration, 17 FCC Rcd 24282 (2002) at ¶ 2 ("Finally, we clarify that nothing in our rules precludes wireless carriers and PSAPs from mutually agreeing to an implementation schedule different from that prescribed by our rules.").

The attached Appendix includes information on all pending requests for Phase I and Phase II service received from individual PSAPs in the format required by the Commission.⁴ This Appendix lists the name of the PSAP, the date the request was received, whether or not the request is valid, and the status of the request.⁵ To the extent any request has been pending for more than six months, the appendices list specific reasons for the delay, steps taken to resolve the problem, and anticipated date of full completion of the necessary work.⁶

II. GSM OVERLAY NETWORK

As outlined in its previous quarterly reports, Triton intends to utilize the network-based TDOA/AOA location solution for its GSM network. Triton continues working with its network-based location vendor, Andrew, formerly Grayson Wireless, to implement GSM capability within its TDOA/AOA network-based location equipment. As described previously, Triton is working closely with Andrew to engineer their GSM Lb interface into Triton's GSM network. However, Triton is experiencing difficulty integrating the Andrew Lb solution into the TechnoCom PDE mediation and SMLC platform. The TechnoCom mediation device is an integral component of Triton's overall E911 network solution. Triton is working diligently with these vendors to resolve the integration issues and move forward with its Phase II GSM Deployment.

As previously reported, Triton continues to work with Polaris Wireless to extend the capabilities of the Polaris location system to the GSM air interface. Significant progress is being

⁴ Wireless Telecommunications Bureau Standardizes Carrier Reporting On Wireless E911 Implementation, *Public Notice*, CC Dkt. 94-102, DA 03-1902 (rel. Jun. 6, 2003).

⁵ *Order to Stay* at ¶ 29.

⁶ *Id.*

made in the implementation of the Polaris location system for GSM. The Polaris Location system is not affected by the integration problems outlined above.

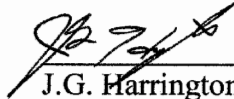

As discussed previously, Triton offers GSM service to Triton subscribers only in selected markets and thus far has a very limited number of GSM customers. While Triton expected to have a Phase II GSM solution available sooner, Triton is coordinating GSM Phase II implementation with affected PSAPs.

III. ADDITIONAL QUESTIONS

Should there be any questions or if any additional information is required, contact the undersigned.

Respectfully submitted,

X	1782	Hart County E9-1-1	GA	HART	2	TDMA/GSM	7/11/2002			N/A		Future	6	This PSAP is currently only being served with one cell site that actually physically does not reside within the PSAP area (calls from two of the three sectors on the site are routed to this PSAP). In addition, the site in question is on the edge of Triton's network. The PSAP that handles the adjoining county to Hart County has yet to request Phase II. The parties have agreed to defer implementation until such time as provision of location information is practical.
